

Water Weekly

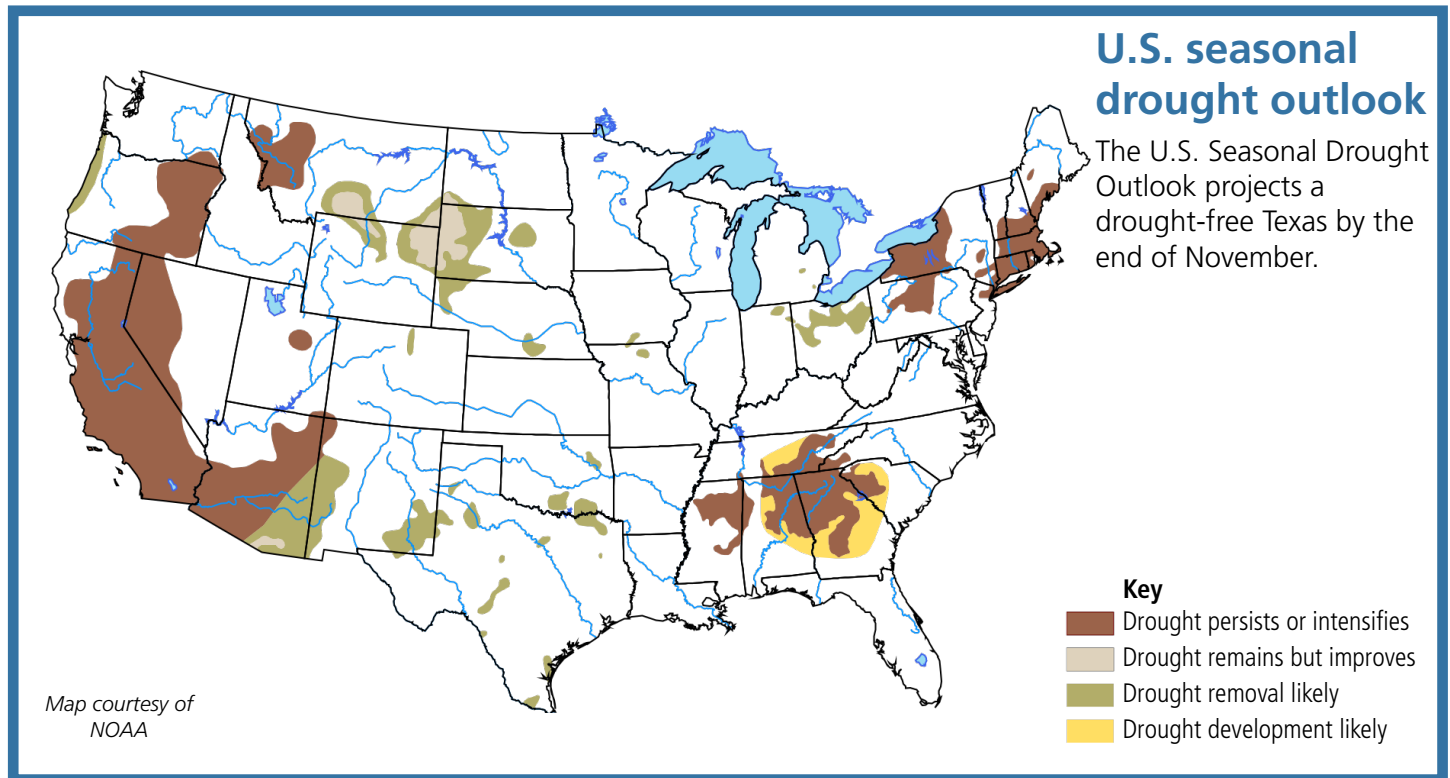

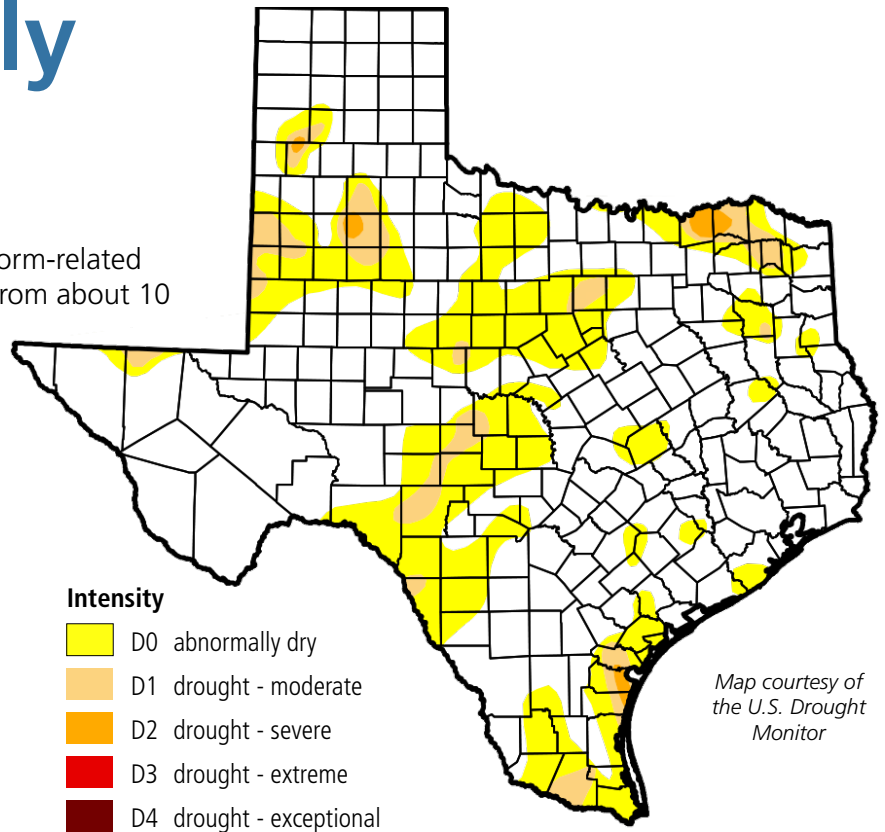

For the week of 08/22/16

Water conditions

After a bit of unusual August non-tropical storm-related rainfall, drought conditions have decreased from about 10 percent of the state to 5 percent, with most of the beneficiaries east of I-35. Even with those improvements, moderate drought has newly appeared in Hidalgo, Parker, and Palo Pinto counties, and severe drought has appeared in Kleberg, Nueces, and San Patricio counties.

Drought conditions

- ◆ 5% now
- ◆ 10% a week ago
- ◆ 0% three months ago
- ◆ 25% a year ago
