

Water Weekly

For the week of 09/01/25

Water conditions

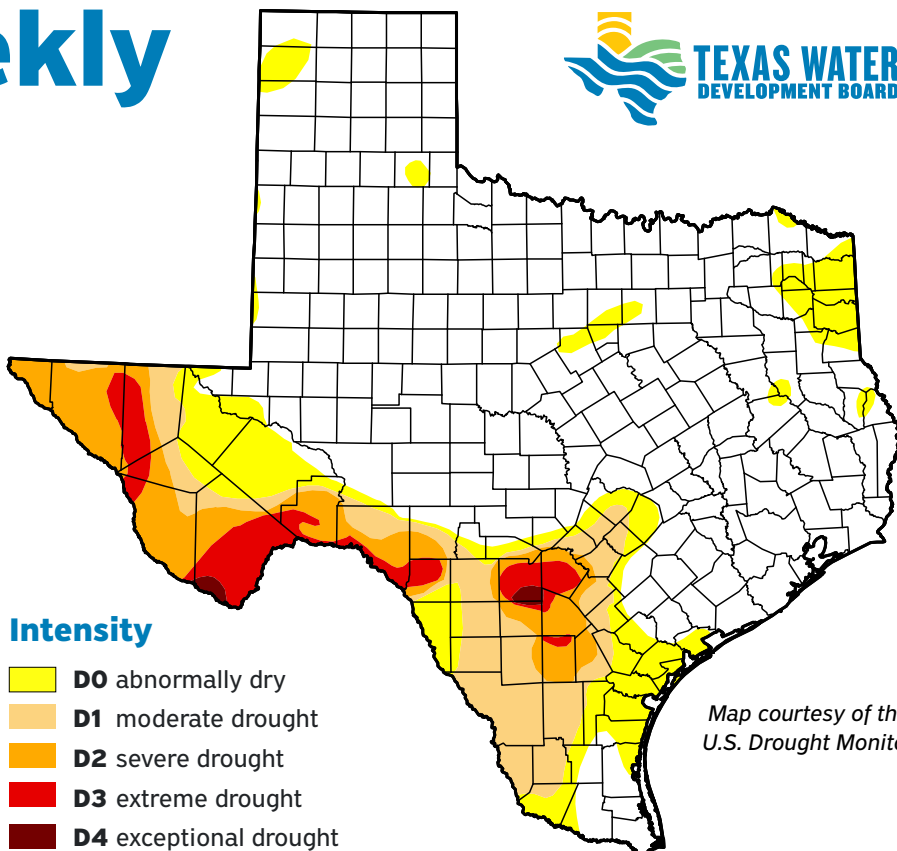

Following a recent pattern, the latest drought map for conditions as of August 26 shows little change from the previous week. Since mid-July, drought area in our state reached a high of 22 percent on July 15 and a low of 19 percent on August 5.

Drought conditions

20% now
20% a week ago
39% three months ago
48% a year ago

Intensity

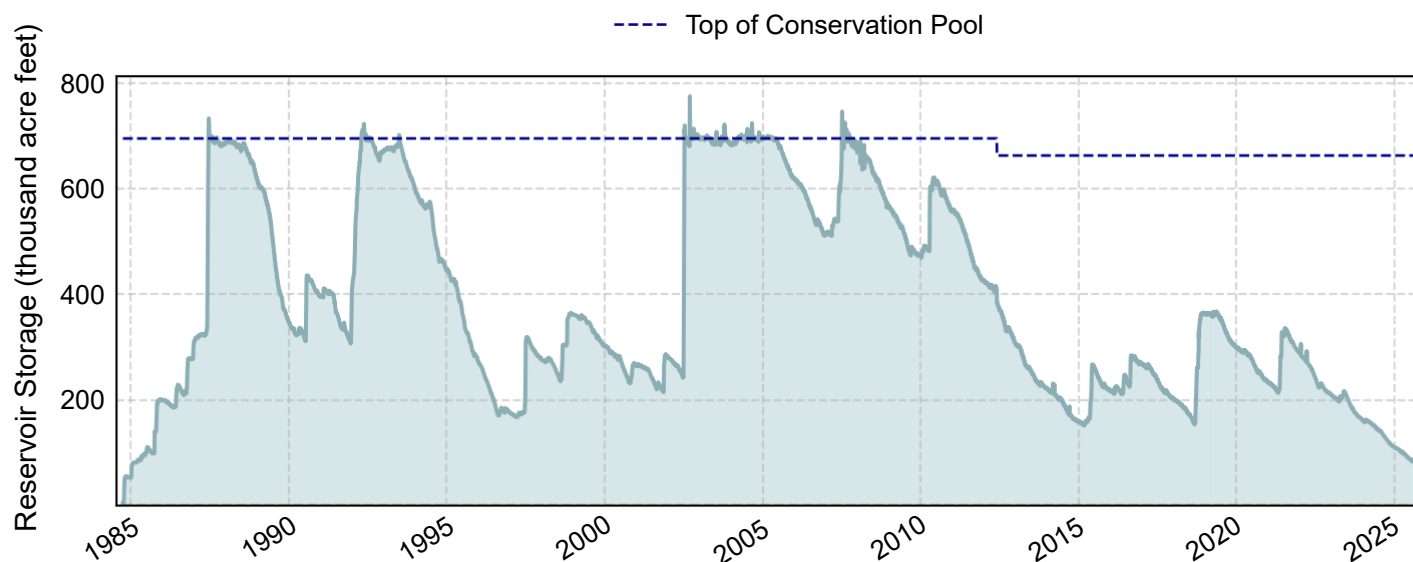

D0 abnormally dry
D1 moderate drought
D2 severe drought
D3 extreme drought
D4 exceptional drought

Choke Canyon Reservoir storage

Years of drought have reduced storage in Choke Canyon Reservoir, an important water supply for South Texas. Storage never fully recovered after the 2011-2015 state-wide drought and recently dropped to less than 80,000 acre-feet for the first time since the reservoir initially filled in 1987.
