

Water Weekly

For the week of 09/08/25

Water conditions

The latest drought map for conditions as of September 2 shows a less than one percentage point increase in drought from the previous week. That's only the second weekly increase in drought since April. Recent rains are likely to reduce drought on next week's map.

Drought conditions

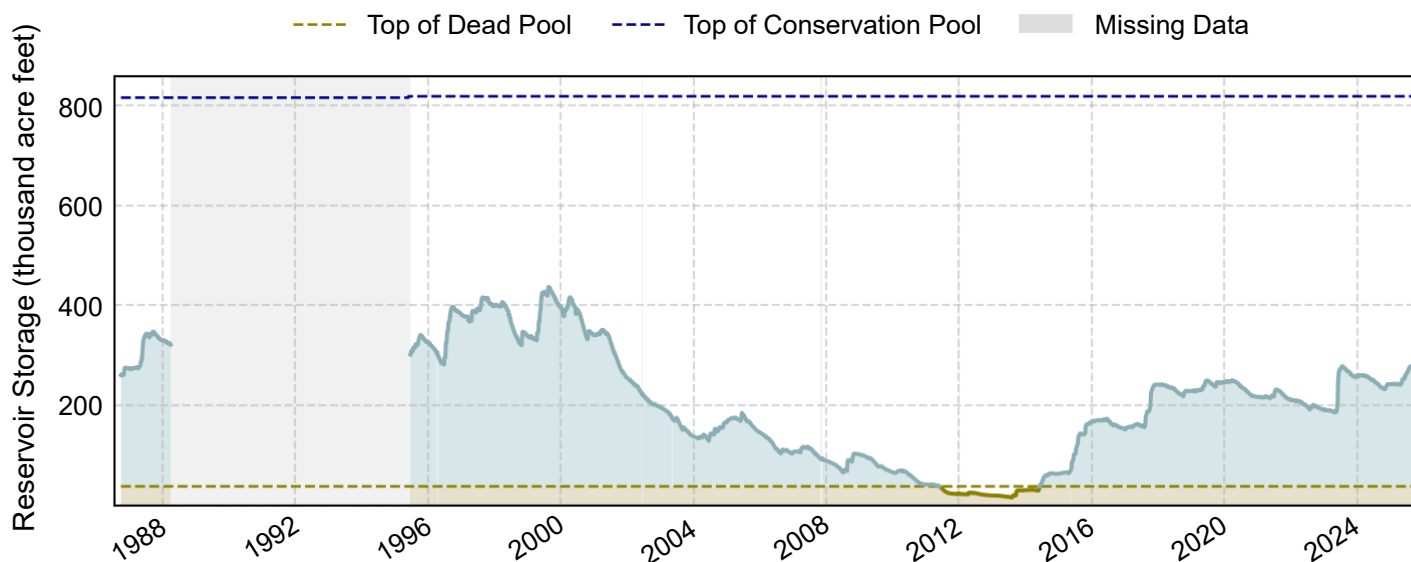

20% now
20% a week ago
36% three months ago
36% a year ago

Intensity

D0 abnormally dry
D1 moderate drought
D2 severe drought
D3 extreme drought
D4 exceptional drought

Lake Meredith storage

Storage in Lake Meredith, an important water supply in the Texas Panhandle, is approaching 280,000 acre-feet for the first time since October 2001. Storage in the lake declined from more than 400,000 acre-feet in April 2000 to less than 17,000 acre-feet during the 2011–2015 statewide drought.
