

# Water Weekly

For the week of 01/26/26

## Water conditions

The latest drought map for conditions as of January 20 shows an increase in drought area, the seventh consecutive week with an increase. Drought area has reached its largest extent since March 2025. Severe drought covers more than a third of the state, the most since April 2025.

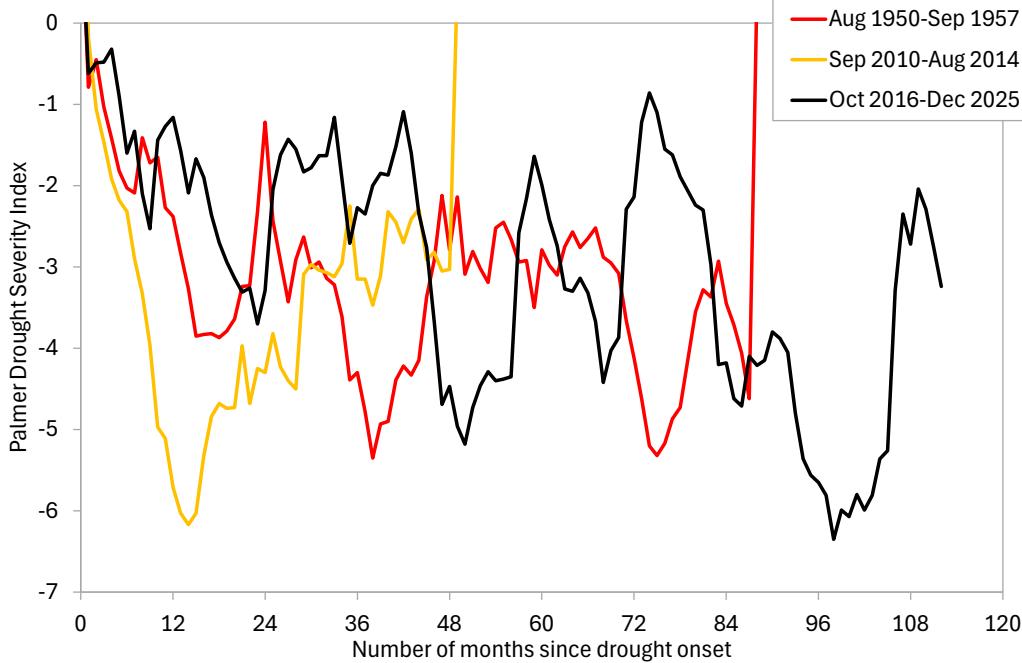

## Drought conditions

**68%** now  
**63%** a week ago  
**43%** three months ago  
**42%** a year ago

## Intensity

- None
- D0 Abnormally dry
- D1 Moderate drought
- D2 Severe drought
- D3 Extreme drought
- D4 Exceptional drought

## Jeff Davis County drought

Jeff Davis County in West Texas may be experiencing a new drought-of-record as measured by the monthly Palmer Drought Severity Index (PDSI). The current drought, which began in October 2016, is now longer than the 1950–1957 drought and has achieved a more severe (lower) PDSI value than the 2010–2014 drought.
