Water Weekly

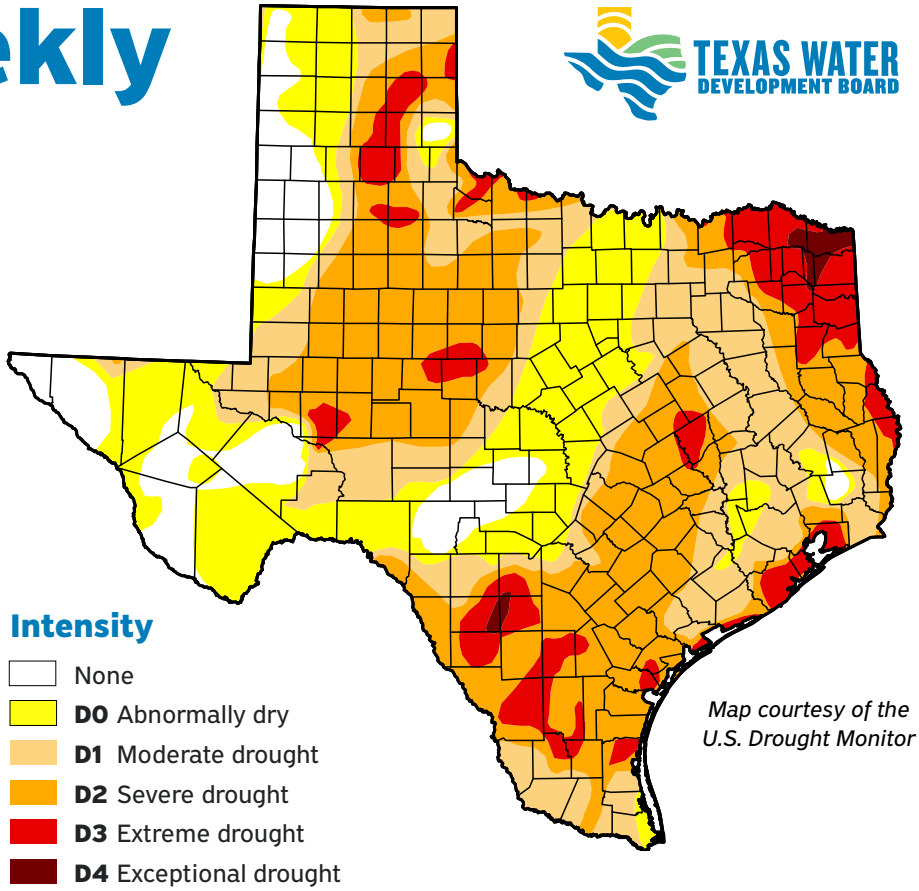

For the week of **11/02/26**

Water conditions

The latest drought map for conditions as of October 27 shows the fourth consecutive week of drought contraction and the smallest extent of drought in ten weeks. Over the last week, improvements in the Panhandle and north central and West Texas outpaced degradations in East Texas.

Drought conditions

Drought change in the last month

Since September 29, drought has contracted from 92 to 68 percent of the state. Parts of the Panhandle and north central, South, and West Texas have seen two or more categories of improvement in that time. Smaller areas of South, Central, and East Texas have continued to degrade.
