

DROUGHT CONDITIONS

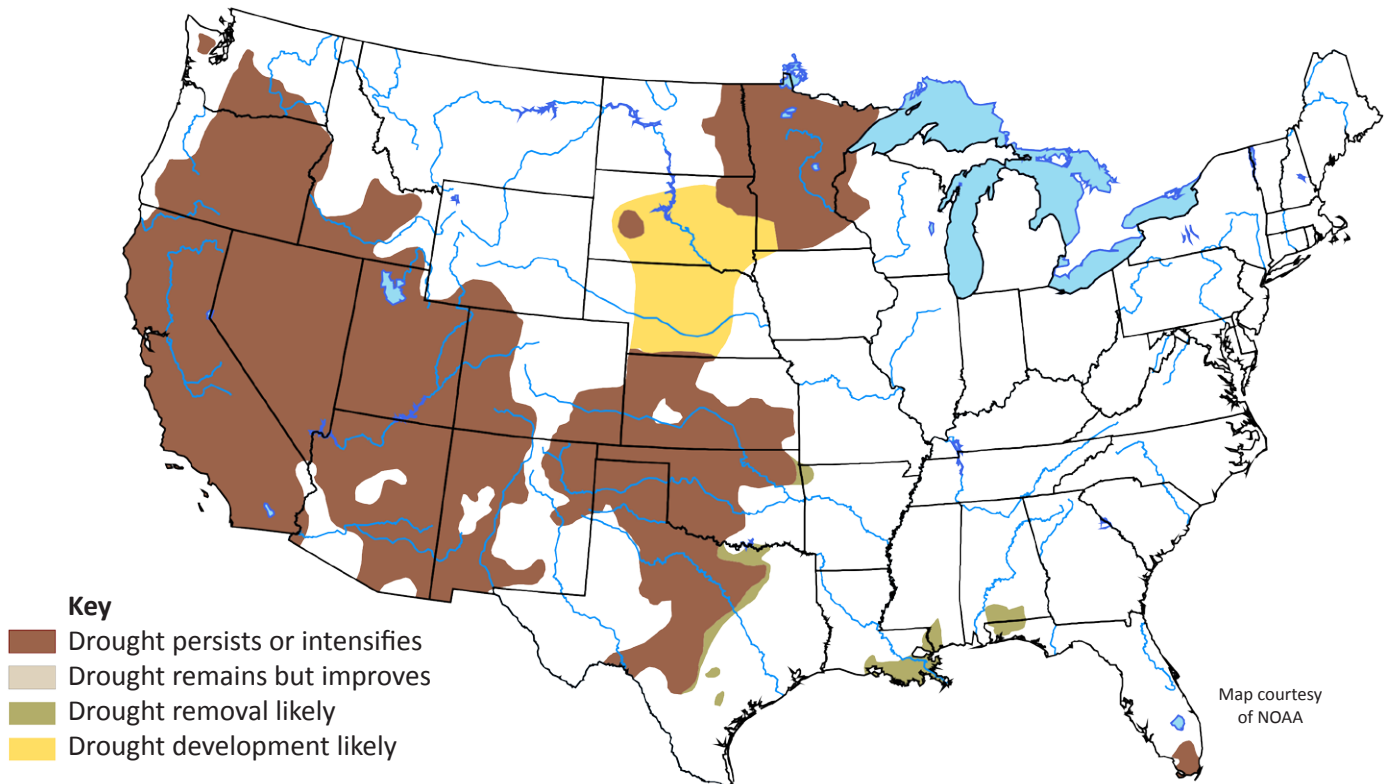

Statewide drought and reservoir conditions remained relatively unchanged compared to last week with a slight increase in statewide conservation storage. Although the drought outlook through the end of June indicates improvement, the outlook through the end of April shows mostly continued drought conditions with slight improvements along drought's edges in central and north central Texas.

Drought statistics

- 37% of state currently in moderate to exceptional drought
- 36% a week ago
- 45% three months ago
- 67% a year ago

DROUGHT TENDENCY THROUGH APRIL
