

Water Weekly

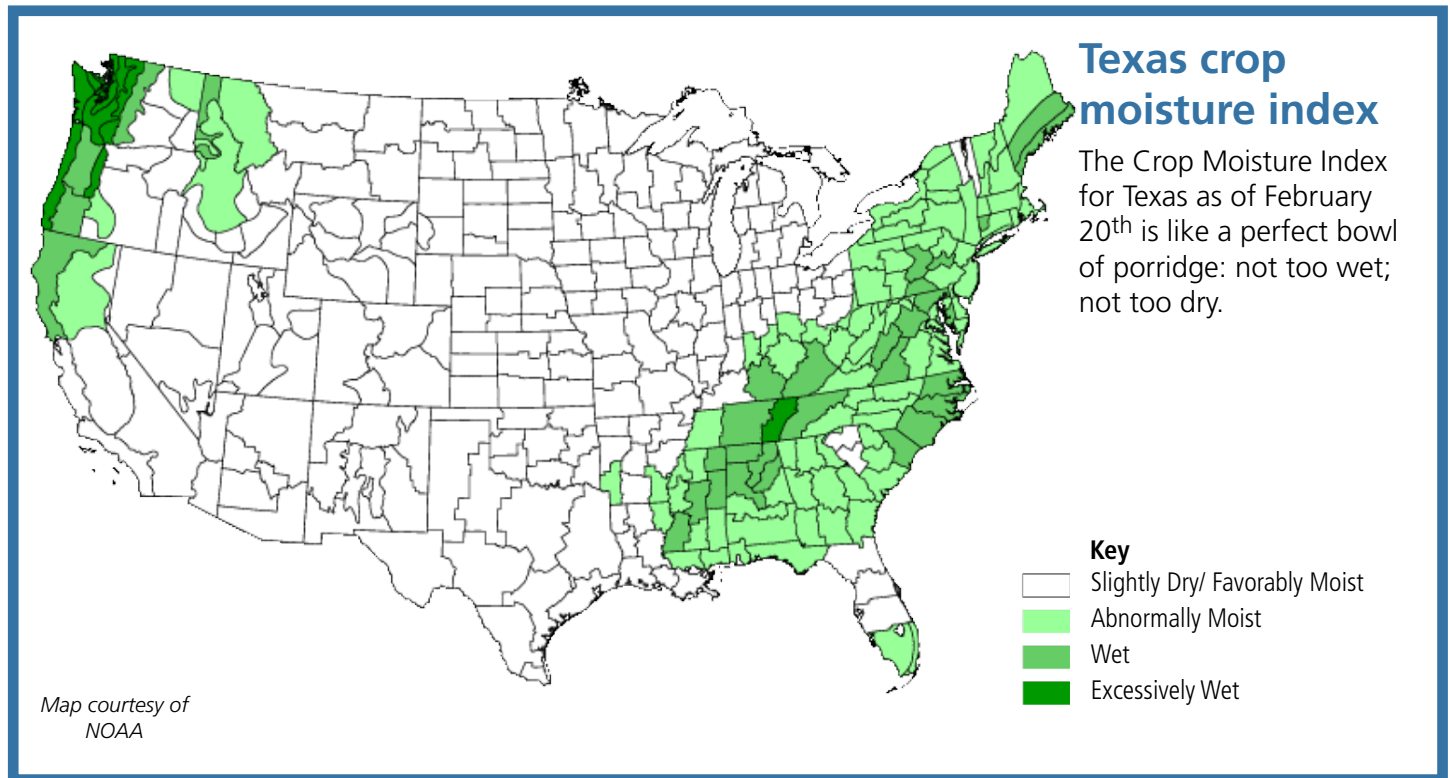

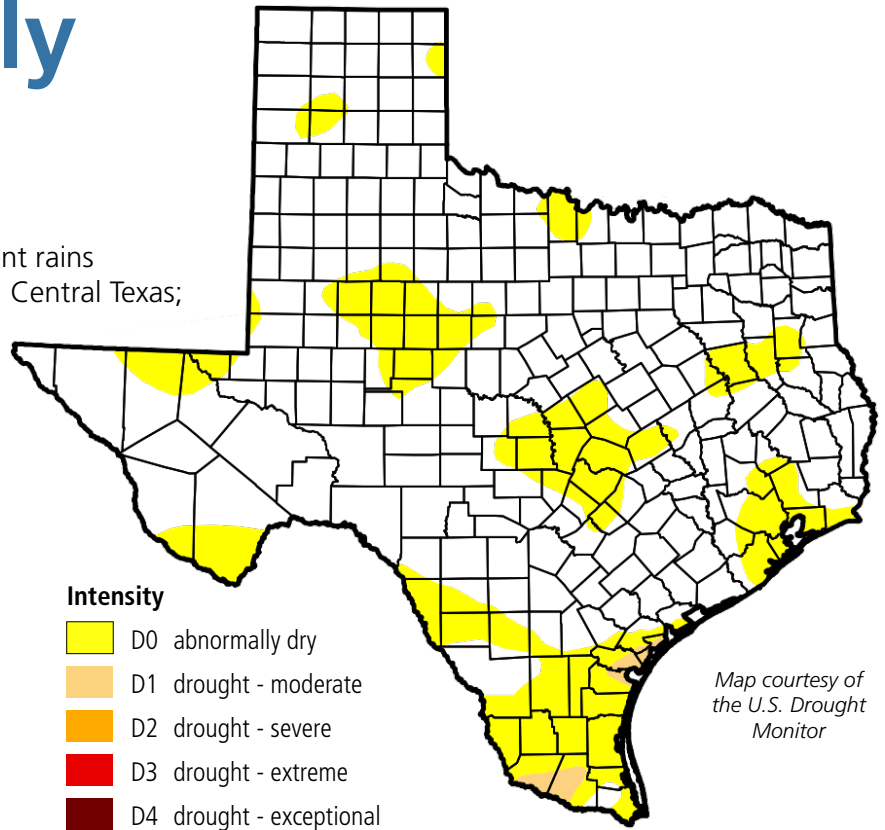

For the week of 02/29/16

Water conditions

Easy come, easy go (and thankfully so)! Recent rains completely rubbed out drought conditions in Central Texas; however, moderate drought increased in the Lower Rio Grande Valley and Corpus Christi areas. Overall statewide drought conditions decreased from 3.6 to 0.8 percent of the state. More rain is expected over the next week in the northwestern part of the state.

Drought conditions

- ◆ 0.8% now
- ◆ 4% a week ago
- ◆ 0.6% three months ago
- ◆ 43% a year ago

Written by Dr. Robert Mace — Dr. Robert Mace is the TWDB Deputy Executive Administrator for Water Science and Conservation. Robert has a B.S. in Geophysics, an M.S. in Hydrology, and a Ph.D. in Hydrogeology. He has been at TWDB since 1999.
