Water conditions

The latest drought map shows areas of improvement in the Panhandle and West Texas, but drought expanded and intensified in Central and South Texas. Overall, the area of the state impacted by drought increased 1 percentage point.

Drought conditions

- 60% now
- 59% a week ago
- 41% three months ago
- 2% a year ago

Major municipal reservoir system storage

Reservoir systems are generally lower during the summer. This year, most systems are down compared to last summer, but still above where they were in 2011, the worst statewide one-year drought in more than a century.
