

# Water Weekly

For the week of 07/15/24

## Water conditions

The latest drought map for conditions as of July 9 shows a small decrease in the total area of the state impacted by drought. In the last week, conditions improved in parts of the Panhandle and Central and South Texas but degraded in a smaller area of West Texas.

## Drought conditions

**25%** now

**26%** a week ago

**25%** three months ago

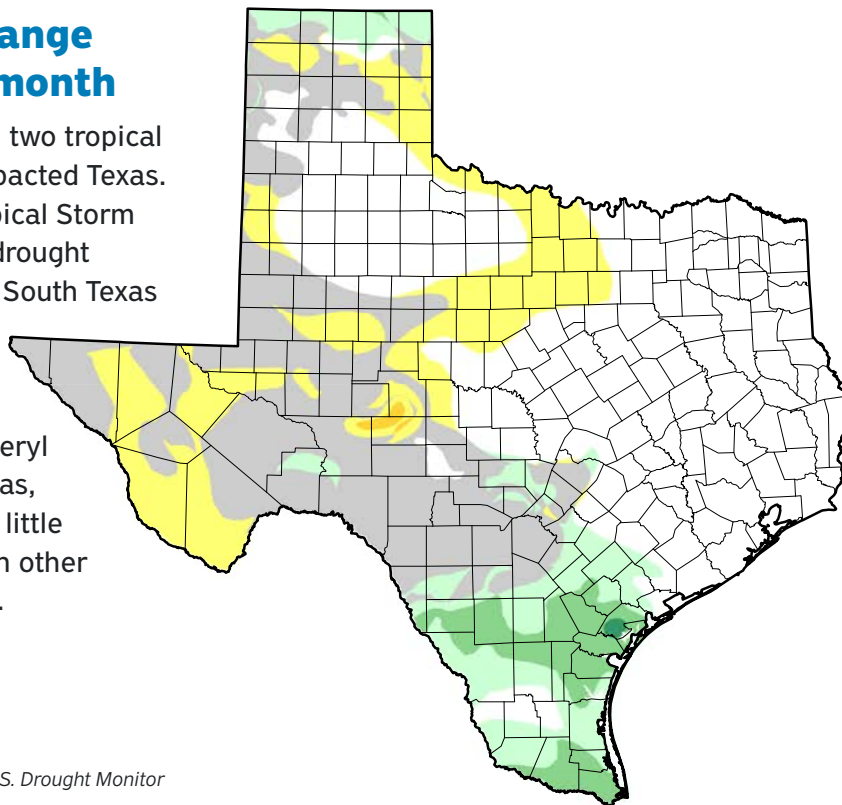

**31%** a year ago

## Intensity

- **D0** abnormally dry
- **D1** moderate drought
- **D2** severe drought
- **D3** extreme drought
- **D4** exceptional drought

## Drought change in the last month

In the last month, two tropical systems have impacted Texas. In late June, Tropical Storm Alberto brought drought improvements to South Texas but did little for area water supplies. In early July, Hurricane Beryl battered East Texas, but the storm did little to ease drought in other parts of the state.
