

Water Weekly

For the week of 01/21/25

Water conditions

The latest drought map for conditions as of January 14 shows a net decline in drought from the previous week. Recent rains in East, North Central, and Coastal Texas helped improvements in those parts of the state outpace degradations in Central and West Texas.

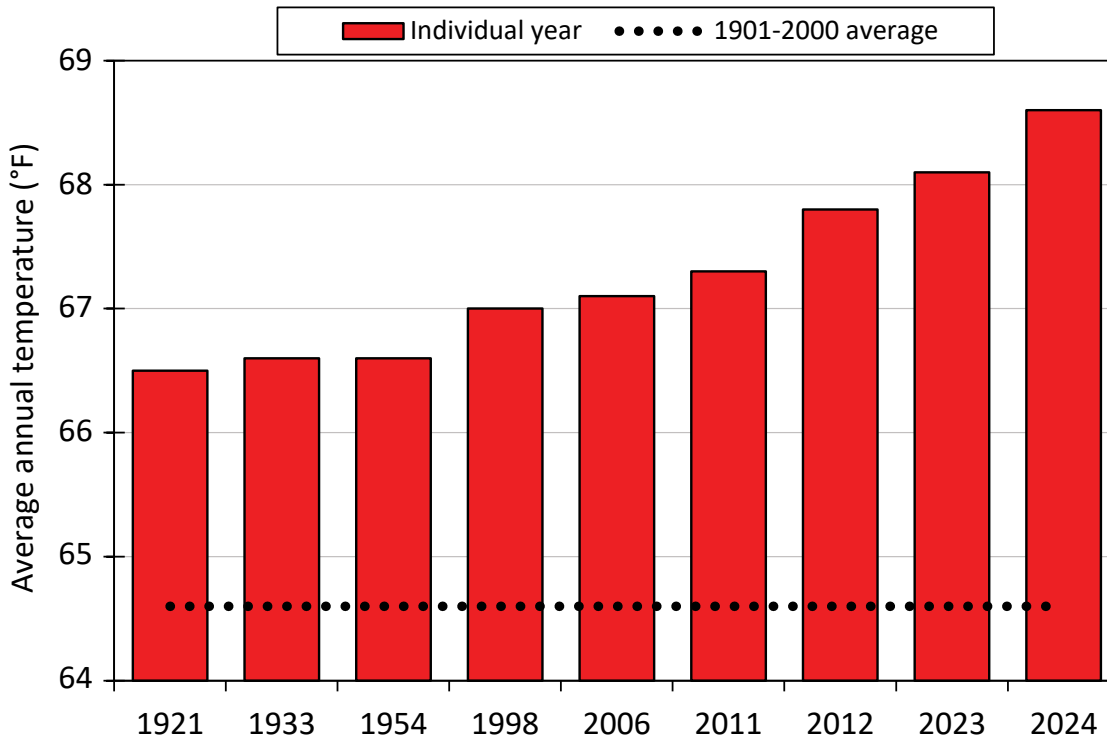

Drought conditions

- 42% now
- 44% a week ago
- 55% three months ago
- 31% a year ago

Intensity

- None
- D0 Abnormally dry
- D1 Moderate drought
- D2 Severe drought
- D3 Extreme drought
- D4 Exceptional drought

Record annual temperature

In 1921, Texas set a record for warmest year in data going back to 1895 (66.5 °F). The record was reset and tied in 1933 and 1954 (66.6 °F). Since 1998, the record has been reset six times, most recently in 2024 (68.6 °F).
